Lakeview Green Sustainable Conservation and Construction

During the development process designing Lakeview Green, we took special care to harvest, recycle and reuse as many materials as possible from the old Davis School.

We harvested the large trees along 5th Avenue South and used them to:

1. Make benches along east side of stream (maybe we should insert a few pics of each item)
2. Make table tops for the resident lobby's on levels 2-5
3. Recycled the original granite curbs that are now used as steps on the east sides of the stream
4. Recycled the original granite curbs that are now used as paths and steps on the west side of the stream and landscaping
5. Harvested the solid wood doors from through out the old Davis School. We are still trying to figure out what to do with them. They would probably be ideal for desks.
